Address: Atariya , Jalaun, UP

Phone: 8957466730

Email: sonpalp345@gmail.com 

Summary

Passionate about full stack development, I've built several personal projects that combine frontend and backend skills. While I lack formal experience, my hands-on work demonstrates my ability to create responsive UIs, scalable APIs, and manage databases—preparing me to contribute effectively in a professional setting.

Projects

1. Ecommerce Website

[Try it Now](#)

- Secure user login and registration processes, implementing JWT tokens to ensure data integrity and privacy.
- Integrated the Fake Store API to access sample product data, enabling the product listings, cart functionalities, within the ecommerce project.

2. Ticket System App

[Try it Now](#)

- Backend Api and Database Integration for AuthN, AuthZ and supporting App functionality.
- Three user roles: Customer (reporting and tracking bugs). Engineers (updating bugs status) and Admin (system oversight) .

3. Tasty Cloud Restaurant App

[Try It Now](#)

- Backend Api and Database Integration for Authentication and supporting App functionality.
- Add to cart functionality , Integration Stripe Payment , checkout page and admin page .
